

## BP-ATC Mission

*Establish a sequence of research, development, education, training and technology transfer programs focused on sustainable food security in Bangladesh*

# Partnership Strategic Goals

1

**Utilize new technologies to enhance national agricultural research capabilities** through transfer of advanced tools and technologies, multidisciplinary working and investment in equipment / specialized facilities.

2

**Develop human capital and advanced technologies** at graduate to post doctoral levels, especially women, to utilize new 'tools' and raise productivity and resilience.

3

**Integrate climate resilience and sustainability into all projects** especially through soil health, utilizing genetic diversity, water management and crop utilization.

4

**Focus on productivity and added value outcomes** that *support women and poor and marginal farmers*

5

**Address key UN Sustainable Development Goals** especially zero hunger, climate action and partnership.
